Targeted advocacy helps make our water safer!

Water pollution can come from a variety of sources, and can have a dramatic impact on the communities that drink it. One pollutant in particular, as detailed by Arlene Blum and her team at the Green Science Policy Institute, was found in fire-fighting foam that was used during training exercises in the area.

Thanks to their advocacy, the U.S. Air Force will switch to using water instead of the highly fluorinated chemicals. This is estimated to impact up to 6 million Americans! Simply switching out these chemicals in training exercises on military bases and airports will make a big difference.

Arlene continues to travel the world educating about the ways we can reduce our chemical exposure. Let's hope this success sets an example to other communities so that we can all be protected from the harmful chemicals in fire-fighting foam! Check out <http://greensciencepolicy.org/> to learn more!

New! ZBC Blog Book Review

This month we publish the first of our book reviews!

There are thousands of books out there on the topic of breast cancer. Many researchers, survivors and family members of survivors share their books with us. The least we can do is read them and share with you which ones we think will be of interest and why.

We are excited to begin our monthly book review blog with a real gem!

"Bald is Better with Earrings" by Andrea Hutton, is a highly readable personal account by a breast cancer survivor and is full of wisdom and humor. Check out our blog [here](#) to learn more!

Only Two Weeks Away Now!

18th Annual Wine, Women & Song Benefiting Zero Breast Cancer

SATURDAY OCTOBER 22, 2016

@ 7 p.m., Trek Winery, Novato.

Wine, Women & Song raises money for the fight against breast cancer. This delightful annual event features an intimate evening of song with Sherrie Phillips Band, The Dolly Mamas, and Susan Z with MC Renee Richardson and special guest Michael Pritchard. Light fare will be served.

Tickets available at winewomensong.bpt.me!

Even if you aren't available that evening you can provide an opportunity for a breast cancer survivor to attend by sponsoring a ticket. That would mean so much!

MARIN GENERAL HOSPITAL

The role of social support in breast cancer survival: a conversation

Monday October 24th
6:30pm – 8pm

1350 S. Eliseo Dr
Greenbrae CA 94904
Please find us in The Atrium

Zero Breast Cancer helps individuals and communities understand scientific research on environmental risk factors and lifestyle variables that influence breast cancers. We promote disease prevention through targeted communication of evidence-based recommendations that support health and wellness at key stages of life.

We envision a world with zero breast cancer!
